

EASTBROOK High School

Training with BlocDoc Since 2011!

“We’ve noticed a difference in performance during competition as our sprinters approach races with far more confidence than prior to the use of the BlocDoc. This has resulted in more athletes placing than in the past.”

“From the first practice on, we noticed a change in attitude with our athletes about practicing starts.” “In fact, we have to pry the blocks away from our most dedicated athletes up to 1/2 hour after the end of normal practice, because they want to keep working. “

“The BlocDoc is solid. As Athletic Director, the BlocDoc gives me confidence I am putting our athletes in a safer practice environment than when we used other outdated methods to secure our blocks.” As a result of having them, Eastbrook Academy practices starts more often than in previous seasons. The middle school kids are also using the BlocDoc, giving them many quality practice starts, which should pay dividends by the time they reach tougher competition in high school. “In the long run, purchasing the BlocDoc has been a wise investment and one that, if given a choice, I would make again.”

*Jayne Swick
Athletic Director*
